

Label language on wind speed. All written in advisory tone, or placed in advisory/recommendation section.

228-366 (glyphosate)

Drift potential is lowest between wind speeds of 2 to 10 mph.

100-1161 (glyphosate, atrazine, s-metolochlor; RUP)

(In section called Recommendations to Avoid Spray Drift)

Do not spray if wind speed is in excess of 10 mph or if winds are gusty.

228-509 (glyphosate, prodiamine)

Drift potential is lowest between wind speeds of 2 to 10 mph.

100-1075 (tefluthrin; RUP; granule)

None
